

Crinolina è una collezione di lampade di Susanne Philippson. La caratteristica delle lampade è quella di avere il diffusore in cui pieni e vuoti sono armonicamente bilanciati. Da qualsiasi punto la si osservi, la lampada offre un aspetto asimmetrico e una perfetta fusione degli opposti. I diffusori in PVC all'interno sono di color oro e riflettono la luce rendendo l'ambiente caldo e accogliente. All'esterno sono rivestiti in tessuto di cotone cinzato. La struttura è in metallo verniciato a polveri.

Crinolina is a collection of lamps by Susanne Philippson. These lamps are characterised by a diffuser featuring harmoniously balanced full and hollow spaces. No matter what angle you look at it from, the lamp appears asymmetrical and a perfect fusion of opposites. The gold-coloured PVC diffusers on the inside reflect light, making the environment warm and cosy. The outside is upholstered with chintzed cotton fabric, and the frame is powder coated metal.
