

Graffiti nasce dall'intuizione di Kazuhiro Yamanaka di unire eleganza, creatività e gioco. Il risultato è una lampada originale, una scultura di luce che nella sua leggerezza diventa protagonista dell'ambiente. La lampada è dotata di bacchette in acciaio inox con le quali si può giocare disegnando "graffiti" nell'aria e creando un'opera d'arte in grado di costruire lo spazio intorno. Le bacchette possono essere facilmente appoggiate alla struttura magnetica per dare vita ogni volta a un disegno unico che caratterizza l'ambiente circostante. La luce che viene emessa dalla struttura enfatizza il tratto disegnato dalle bacchette in acciaio.

Graffiti is Kazuhiro Yamanaka's brainchild, combining elegance with creativity and playfulness. The result is an original lamp, a sculpture of light that delicately steals the spotlight in the room. The lamp has stainless steel sticks that you can play with, drawing "graffiti" in the air and creating a work of art that builds the space around you. You can easily set the rods on the magnetic frame to give rise to a unique design that distinguishes its surroundings, time after time. The frame gives off light that emphasises the feature drawn by the steel sticks.
